

## Accelerate the Accounts Receivable/ Procure-to-Pay

GRM Digital's comprehensive Digital Accounts Receivable solution simplifies and integrates processes between companies and suppliers. Organizations can quickly transition from paper to electronic documents, generating an immediate return on investment.

With GRM Digital's solution, the entire AR document flow is captured, and purchase orders, faxes, remittances and other inbound documents are converted to digital images. System-generated documents such as invoices, shipping documents and packing slips are automatically captured, indexed and stored in the GRM Online Record Center, along with correspondence, inquiries, emails and scanned images.

The result?

Documents are always available for easy access, DSO is reduced, processes are improved, errors are decreased, and overhead costs are a fraction of what they were.

GRM Digital enables enterprises to quickly migrate to a web-based AR solution that will:

- Streamline inefficient, paper-intensive processes and reduce the cost of the entire procure-to-pay process
- Store AR documents electronically, making them available for searches, data mining, reporting and workflow processes
- Significantly reduce the time and resource issues of maintaining and managing paper files
- Reduce payment errors, labor and processing costs
- Increase capture of early payment discounts
- Eliminate lost or misfiled AR and supporting documents
- Enable immediate access to transaction information for collections
- Ease the process of preparing financial, tax and compliance reports
- Reduce the labor and processing costs of retrieving financial information for audit purposes
- Improve supplier relationships through quick response to inquiries
- Automatically route documents where they are needed
- Ensure compliance with regulatory statutes
