

PARTNER WITH GRM FOR A FULLY INTEGRATED ECM SOLUTION

As a leader in Cloud-based document management, with billions of documents managed and protected, GRM is looking to leverage its innovative information management systems and services in collaborative partnership with select organizations.

The aim is to build a mutually beneficial team dynamic while fully developing/enhancing applications that take your company to the next level.

Our ECM Solution, provided through the SaaS and Cloud-based GRM Online Record Center adds seamless, fully compliant document storage and retrieval capabilities to your applications with little or no additional development/support costs.

Key advantages of joining forces with GRM and the Online Record Center include:

- Tablet and Mobile Accessibility
- Immediate capture from multiple points of entry (scan, fax, email, text, document upload, etc.)
- Lower costs, greater productivity, improved accuracy through workflow automation
- Customizable menus and easy to use API (Application Programming Interface)
- Eforms development
- ESignature (allows immediate electronic signing of documents)
- Supplemental ECM backup when other systems experience downtime
- Encryption for documents at rest and in transit
- Seamless integration with document scanning
- Compatibility with Microsoft Office and other popular software
- Pay-per-use pricing
- Quick deployment in as little as 30 days

GAIN MORE THAN 25 YEARS OF COLLABORATIVE EXPERIENCE

At the forefront of information management innovation for over a quarter of a century, GRM retains ongoing partnerships with a growing list of leading technology companies.

Flexibility allows GRM strategic partners to brand and implement our Online Record Center digital repository as an alternative sales model and customer-facing hosting site.

In addition to the Online Record Center ECM platform, we offer other information management services such as offsite document storage, on-demand imaging, data protection and certified destruction.

These services, in different configurations, are often brought together in the form of a unique, fully integrated Blended Solution that simultaneously supports paper and digital inventories while migrating records to an electronic environment.

Another critical component that makes GRM and the Online Record Center ideal for partnering is affordability. As a completely web-based system, full ECM capabilities are yours for one low, monthly subscription fee.

To ensure a rapid Return on Investment, the Cloud-based Online Record Center deploys quickly and requires:

- Little or no upfront capital expenditure
- Little or no training
- No software to install, maintain and update
- No servers or IT investment
