

# MAKING LIGHT WORK OF HEAVY HR PROCESSES

VisualVault, a cloud-based SaaS platform, specializes in the automation of data and document-intensive processes. With advanced Human Resources solutions in place, our technology represents an opportunity for PEOs and HR Outsourcing companies to offer their clients and prospects cutting-edge technology that's simple to implement and brings dramatic efficiencies to critical HR functions such as onboarding, payroll and benefits.

## AUTOMATIC AUTOMATION

With VisualVault's suite of tools, such as intelligent capture, Intelligent Forms (iforms) and workflow automation, you and your clients can automate labor-intensive processes quickly and cost effectively.

Our iforms technology virtually eliminates data entry work and our easily configurable workflow automation solutions deliver the right information to the right people at the right time.

## EXTREME FLEXIBILITY

Ready-made HR templates within VisualVault include HR-specific user interfaces and menus as well as HR-centric iforms and library structures. And, if these templates aren't exactly what's needed, our no-code and low-code solutions put customization on a fast-track.

And perhaps most importantly, our scalable, web-based platform integrates seamlessly with existing technologies and feeds more and better data directly into your HRIS system. And better data equals better business.

## STRICT COMPLIANCE

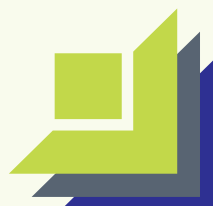

While we talk a lot about the benefits of speed, flexibility and adaptability, we also live and die by the strictest security standards and deep expertise in compliance and governance. This commitment and expertise can be seen firsthand in our built-in compliance and regulatory workflows that keep track of and manage a broad variety of programs and regulations such as:

- HIPAA (Health Insurance Portability and Accountability Act)
- COBRA health coverage
- FMLA (Family Medical Leave Act)
- UNERRA (Uniformed Services Employment and Reemployment Right Act)

## BIG OPPORTUNITY

The management team at VisualVault recognizes that your success is largely dependent upon you delivering your clients heightened levels of efficiency and allowing them to focus on what they do best – run their business. The operational efficiencies that VisualVault creates can do the same for you and for your clients.

Partnering with VisualVault is a move that will bring you and your clients exactly what you seek – simplicity, speed and nearly immediate ROI.

Our intelligent forms technology (iForms) virtually eliminates staff data entry work and our highly configurable workflow automation proactively delivers the right information to the right people at the right time.

And perhaps most important of all, our scalable web-based platform was designed and built to integrate seamlessly with your existing technology systems.

The implication of that? Fast. Inexpensive. A real solution for your real challenges.

## IMPROVE SERVICE QUALITY

### More efficient enrollment, licensing, complaint processing, enforcement and QA.

The flexibility and cost savings associated with cloud computing is now available with VisualVault's Case Management Solution (CMS). VisualVault's unique CMS design and ease of configuration for individual group and user requirements eliminates the labor-intensive tasks associated with onboarding, routing, sorting, filing, managing and reporting. FOIA requests, contract management, investigations, claims, and complaint management are a few of the processes that are transformed using VisualVault CMS.

### Reinvent licensing and compliance.

Leading licensing agencies are leveraging VisualVault's intelligent automation platform to reduce or eliminate manual work and improve licensing speed and accuracy to providers, businesses, and families. The ease of integrating VisualVault's cloud solution and affordable monthly subscription fee finally enables departments to modernize aging processes that no longer effectively support the needs of the organization and the people they serve.
