ON-CALLCONNECT
PHYSICIAN ON-CALL SOLUTION
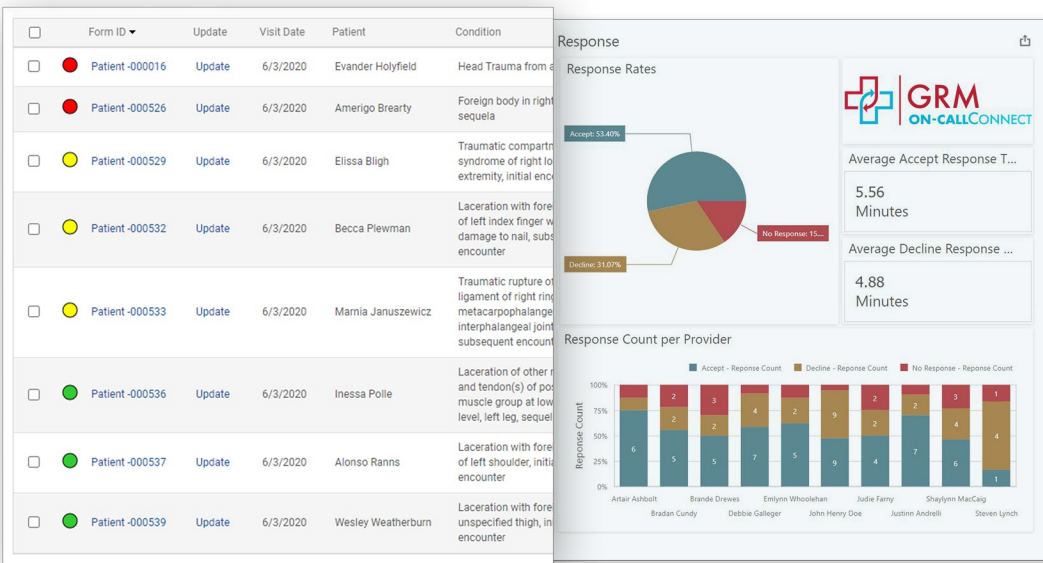

MANAGING ON-CALL OPERATIONS TO LOWER COSTS AND EXPEDITE CARE.

On-call operations are typically plagued by two things – inefficiency and lack of visibility. And that's why scheduling software alone fails to pay big dividends. A more holistic approach is required to address inefficiencies throughout the process and deliver visibility into every component of the program.

GRM's new On-CallConnect is a cloud-based, mobile-centric product that automates and organizes the processes associated with managing on-call physicians, delivers invaluable data, lowers costs and improves resulting patient care.

On-Call Operations Improved from A to Z.

On-CallConnect effectively addresses all of the major challenges associated with on-call operations. Processes are digitized and automated. Actions are captured and reported upon. And everything is presented in an intuitive, easy-to-use interface.

Operational Managers provided with real-time view and status of physician requests and responses.

Executive management delivered superior visibility into operations via advanced analytics dashboard.

ER makes clinical data available immediately to on-call physicians in app-less, secure mobile environment.

EVERYBODY WINS

HOSPITALS
Operational improvements deliver substantial savings as a result of improved ED throughput.

PHYSICIANS
Equipping physicians with an easy-to-use technology allows them to work efficiently and deliver optimal patient care.

PATIENTS
Patients receive care faster, resulting in improved satisfaction.
