

HIGHER EDUCATION

DOCUMENT MANAGEMENT SOFTWARE

DELIVERING ACCESS TO DATA & INCREASED EFFICIENCY

Expectations for improved automation and electronic service delivery are increasing throughout the higher education community. Every constituent -- students, faculty, staff -- is demanding improvements in operational practices that make it easier to locate information, collaborate with peers and get work done.

GRM's document management software for higher education, powered by VisualVault, gives you a complete view of student records and improves business processes across the entire campus.

CONTENT MANAGEMENT ACROSS YOUR CAMPUS

GRM's solutions speed the flow of information, protect the confidentiality of student records, improve cash flow, and put university professionals in a position to make informed, critical decisions. And, because VisualVault can integrate with student information systems, it provides a single source for the comprehensive, accurate data required to stretch budgets and remain competitive. VisualVault delivers digital transformation to every corner of your campus.

Enrollment & Admissions

Integrate with your SIS to save time, accelerate administrative processes and give you a comprehensive view of the applicant pool.

Academic Advising

Housing data in a secure repository, process automation and analytics ensure immediate access to all student information.

Financial Aid

Efficiently process high volumes of financial aid applications with advanced capture, iForms and process automation.

Student Onboarding

Guide students through required activities with workflow automation to streamline this time-consuming and cost-intensive process.

Transcript Capture & Transfer Credit Evaluation

VisualVault's Advanced Capture technology extracts student and transcript data, imports it, indexes it and analyzes it.

Student Health

Experts in healthcare integration, capture, conversion and transmission of data, GRM solutions deliver the data you need to deliver superior care.

Alumni and Donor Relations

Organize donor data and take advantage of digital management of gift payments and related documents. Integrate with CRMs to manage communications.

Human Resources

Our HR software solutions seamlessly integrate with existing HCM / HRIS systems to give you full control and superior governance of HR data.

Facilities Management

Organize and share documents based upon user security settings. Automate approvals. Use audit trails to report upon system activity.

Financial Services (AP, Contracts, etc)

Target and remove inefficiencies from AR and AP processes and enjoy contract management tools that speed execution and improve governance.

POWERFUL ANALYTICS & MANAGEMENT DASHBOARDS

Unprecedented visibility into data and insights that deliver a deeper understanding of operations and allow for better decision making. Whether it's Admissions personnel enjoying complete visibility into how the applicant pool aligns with target populations and modeling enrollment scenarios in a real-time mode or Finance analyzing spending by function, VisualVault analytics are a game-changing tool for management of modern colleges and universities.
