

EHR CONSOLIDATION

A COMPREHENSIVE VIEW OF PATIENT DATA

DELIVERING PHYSICIANS A VIEW OF PATIENT DATA ACROSS EHRs

The GRM EHR Consolidation solution is simple to implement and is a cost-effective way of delivering physicians a comprehensive view of patient data from every EHR within your network. Presented as a logical care summary, this data allows healthcare providers to see patient data from across your network – including medications prescribed, trend data related to important health measures and other information that could prove critical in delivering the most safe and effective care possible.

Intelligence That Enables Better Patient Care

Deliver a consolidated view of patient data across all the EHRs within your network; giving physicians the data they require to deliver better patient care.

Simple to Implement and Cost-Effective.

Employing whatever methodology is easiest for you to deliver, we can immediately accept, process, organize and present the data at a fraction of the cost of your other options.
